

Quantity Management

What Is Quantity Management?

It's a quality and safety program that promotes the safe use of medications. The program limits the amount of some medications that we cover.

We base the Quantity Management program limits on U.S. Food and Drug Administration and manufacturer dosing guidelines, medical literature, safety, accepted medical practice, appropriate use and benefit design. The limits only affect the amount of medication your benefit plan covers. You and your doctor make the final decision about the amount of medication that is right for you.

Which Medications Are Included?

We post the most recently updated list of medications on our website. We've included the list that applies to most plans. Check your benefit information to determine if quantity limits apply to you.

For most medications on the list, your plan will only cover a set amount within a set timeframe. Your plan will cover higher amounts of some medications when medically necessary.

If a drug on the list has an asterisk (*) next to it, you may be able to get a medical necessity override for a larger amount. If you need more of these medications, please have your doctor call the Caremark Prior Authorizations department at 800-294-5979. Your doctor can also fax requests to 888-836-0730. Caremark is an independent company that administers the Quantity Management program on behalf of your health plan.

What Happens at the Pharmacy?

The pharmacist enters your prescription information into the computer system. If the drug has a limit on the covered amount, the pharmacist will fill your prescription as long as it does not exceed the limit. If your prescription exceeds the quantity limit, you have three choices:

1. Your pharmacist can reduce your prescription to the quantity your health plan covers.
2. You can pay full price for all of your prescription or for the portion that exceeds the limit.
3. You or your pharmacist can ask your doctor to get a quantity override if one is available.

If your plan approves the additional quantity, it will pay for it. If your plan does not approve it or the override is not available, you can still choose option 1 or 2.

If you submit your prescription to the mail-service pharmacy and (1) you do not meet the requirements for an override for an additional quantity or (2) an override exception is not available for your drug, the pharmacy will not fill your prescription. It will return your prescription to you.

Standard Quantity Management Drug List

Abstral (120 tablets per month)	Dexilant (30 capsules per month)*+++
AcipHex (30 tablets per month)*+++	Dilauidid (180 tablets per month)
Actiq (120 lozenges per month)	Doral (30 tablets per month)++

* The doctor can request a medical necessity override for a larger quantity by calling Caremark at 800-294-5979.

Migraine (+), sleep aid (++) , ulcer (+++) and select pain (++++) medication quantity limits apply to all medications within the drug class. For example, if coverage for a sleep aid is limited to one tablet per day, only one sleep aid tablet per day will be covered. Select (+++++) limits apply to all strengths and combinations. Your benefit document defines actual benefits available and may exclude coverage for certain drugs listed herein. Check your benefit information to verify coverage or view personal benefit information on our website. This list may contain trademarks or registered trademarks of pharmaceutical manufacturers that are not affiliated with your health plan. This list may change or expand from time to time without prior notice. When we list brand-name drugs, the Quantity Limit program may also apply to any available generic equivalents.
