

Keep employees smiling with expert guidance

Professional knowledge for smarter choices

The information and tools available to employees is reviewed by experts to ensure they receive the most current and researched guidance on any topic.

Our MetLife Dental Advisory Council reviews and selects resources from trusted, industry experts — like the American Dental Association. The council is made up of respected academic and practicing dentists, so you can count on the details being right.

Good oral health is an important part of your employees' overall health and wellbeing. And healthy choices mean a healthy mouth. With expert guidance, your employees can make confident decisions about the oral health care for themselves and their families. That's why we've developed our online oral health library: to provide easily understood, dependable information to help engage your employees in their oral health and dental care.

In the oral health library, they'll find:

Articles and videos on helpful topics like dental issues and treatments, the link between oral health and overall health, and more

Tools that support decision-making, like Health Risk Assessments (HRA) and treatment plan checklists

Benefits education to compare different dental plan types and understand how they work

We're here to help your employees make the most of your dental plan. And when employees are better informed about their health and benefits, this may help you lower benefit costs,¹ minimize employee "noise", and create a workforce culture that sees real value in their dental benefits plan.

Get expert guidance for confident decisions — for your organization, and your employees. Contact your MetLife representative today.

1. By educating participants on the benefits of slowing the progression of dental disease or preventing the occurrence of new disease, more costly procedures may be avoided — lowering costs over time.
